

Mihaita Braes

Senior Product Manager · AI, Data & Cloud

mihaita.braes@gmail.com | +40 742 347 072 | Bucharest, Romania | github.com/mihaitabraes

SUMMARY

Product Manager with 6+ years building AI, data, and cloud products across fintech and mobile. Focused on the intersection where product strategy meets analytical rigour — bringing together Data Science fundamentals, LLM integration, agentic AI workflows, and cloud architecture to shape products that are evidence-driven by design. Multiple Generative AI and Databricks certifications. I thrive in environments where "what should we build" is answered with data, experimentation, and a clear-eyed understanding of the underlying systems.

EXPERTISE

Data Science & Analytics	Python · Pandas · NumPy · Statistical Analysis · Probability & Experimentation · ML Fundamentals · A/B Testing · Data Visualisation · Databricks Ecosystem
AI & LLM	Generative AI · LLM Integration · Agentic Workflows · MCP (Model Context Protocol) · AI-assisted Development · Prompt Engineering
Cloud & Data Infrastructure	AWS · Databricks · Azure · Spark · MLflow · Data Pipelines · Real-time Data Flows · Cloud Architecture
Product Management	0-to-1 Product Development · Multi-year Roadmapping · Customer Research & User Interviews · Data-driven Prioritisation · Competitive Analysis · MVP Shaping
Leadership & Collaboration	Cross-functional Influence · Stakeholder Alignment · Executive Communication · Conflict Resolution · Mentoring · Workshop Facilitation
Tools	Claude Code · Gemini · Jira · Figma · Confluence · Miro · Notion · Google Workspace · Slack · Azure DevOps

WORK EXPERIENCE

Product Manager <i>Thinslices · Bucharest (Remote)</i>	August 2025 – Present
- Led product end-to-end for a mobile-first, real-time event discovery platform for iOS and Android — owning the data architecture decisions behind real-time social signals, event ingestion pipelines, and Spotify data integration flowing through a REST API ecosystem. - Drove data-informed product decisions throughout — combining quantitative analysis with regular user interviews and feedback sessions to uncover unspoken needs, directly shaping feature prioritisation and roadmap sequencing. - Owned and drove the product roadmap end-to-end — defining multi-sprint priorities across social features, onboarding, event discovery, and notifications, balancing stakeholder input with data-driven insights to make bold prioritisation calls. - Translated complex data and system challenges into engineering specifications — modelling follow/privacy/notification schemas, data ingestion flows, and real-time social signals as the technical bridge between backend, mobile, and UX teams. - Built and deployed agentic AI workflows with Claude Code and MCP — integrating Jira, Figma, Google Drive, and Slack into a PM agent for automated sprint reporting, backlog generation, and project health monitoring. - Led an AI Hackathon initiative — building a Project Reporting Agent and Sprint Report Generator on LLM-based agentic workflows, demonstrating measurable AI impact on PM productivity. - Authored a data-backed scope and impact analysis to align stakeholders on a 30% budget extension — structuring re-estimations with full transparency and building executive consensus across competing priorities. - Delivered a dementia finance management platform end-to-end — authored a 3-option architectural tradeoff document grounded in data and technical analysis that drove the stakeholder decision and unblocked delivery.	

Delivery Manager

June 2021 – August 2025

Levi9 · Iași (Remote)

- Managed multi-team agile delivery for large-scale Fintech and Transportation products across web, mobile, and API — using data-driven delivery metrics to ensure sprint predictability, technical transparency, and client alignment.
- Delivered a fintech charity donation platform later acquired post-launch — navigated a mid-sprint scope change driven by acquisition requirements, using data and impact analysis to distinguish strategic pivot from scope creep.
- Influenced cross-functional teams to the right outcomes — aligned engineers, product owners, and client stakeholders across multiple concurrent projects, building consensus through structured analysis and clear tradeoff documentation.
- Founded and led an internal Agile training initiative that grew to 11 members, culminating in a public talk: "A State of Agile: The Good, the Bad and the Ugly" (Levi9 Tech Stories, June 2024).
- Introduced data-driven sprint health metrics and analytics to improve backlog quality and align product owners with engineering across multiple concurrent projects.
- Coached junior PMs on data-informed delivery discipline, agile facilitation, and technical communication.

Senior Technical Team Lead

January 2019 – June 2021

SCC · Iași

- Led 4+ cross-functional support teams across multiple industries and international timezones — managing escalations, SLA adherence, and team performance in a high-pressure, always-on environment.
- Analysed operational data to identify performance bottlenecks and redesign task ownership frameworks, increasing SLA adherence by 20%.
- Mentored junior analysts and delivered L2 support for enterprise clients under strict SLA targets.

EDUCATION

BSc Telecommunications Engineering

2014 – 2018

Technical University "Gheorghe Asachi" of Iași

Signal processing, communications systems, and data transmission — analytical and systems thinking foundation applied directly to data product and AI domains.

CERTIFICATIONS

Generative AI & LLM

AWS: Generative AI Essentials (2025) · AWS: Generative AI Sales (2025) · Databricks: Gen AI Fundamentals (2025) · Databricks: Gen AI & LLM (2025) · Databricks: Financial Services AI (2025) · Databricks: Fundamentals (2025)

Cloud & Infrastructure

AWS: Technical Accredited (2024) · AWS: Digital Sovereignty (2024) · AWS: Sales Accreditation (2024) · AWS: Business Accreditation (2021)

Agile & Delivery

PSM I & II — Scrum.org (2022)
